

CREATE A COLLECTION

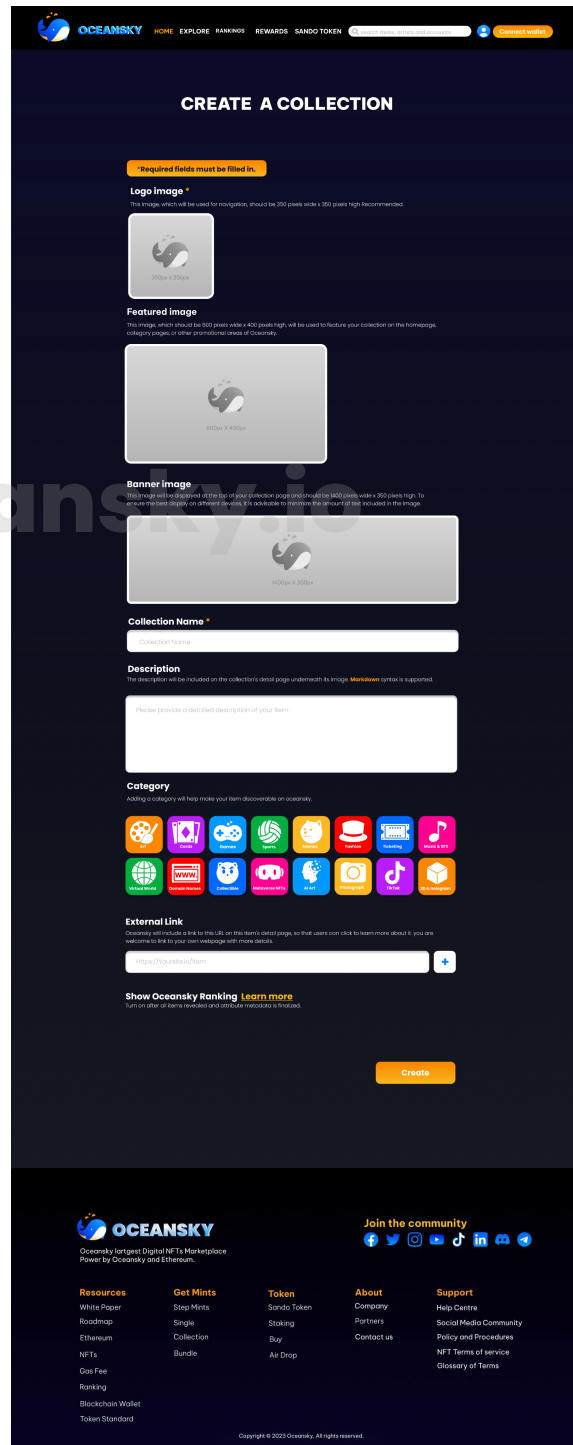

A collection NFT is a type of NFT that represents a group of related NFTs. It can include multiple NFTs from a single category, such as a collection of digital art NFTs, or it can include NFTs from multiple categories, such as a collection of digital art NFTs and music NFTs.

A list of characteristic features of collection NFT includes:

● Composition

Collection NFTs are made up of multiple individual NFTs that are related to each other in some way. Collection NFTs can include multiple NFTs from a single category, such as a collection of digital art NFTs, or they can include NFTs from multiple categories, such as a collection of digital art NFTs and music NFTs.

CREATE A COLLECTION

Required fields must be filled in.

Logo image *
This image, which will be used for recognition, should be 300 pixels wide x 100 pixels high (recommended).

Featured image
This image, which should be 600 pixels wide x 400 pixels high, will be used to feature your collection on the homepage, category page, or other promotional areas of Oceansky.

Banner image
This image will be displayed at the top of your collection page and should be 1000 pixels wide x 300 pixels high. To ensure the best display on different devices, it is advisable to minimize the amount of text included in the image.

Collection Name *

Description
The description will be included on the collection's detail page underneath its image. **Markdown** syntax is supported.

Please provide a detailed description of your item.

Category
Adding a category will help make your item discoverable on Oceansky.

External Link
Oceansky will include a link to this URL on the item's detail page, so that users can click to learn more about it. You are welcome to link to your own webpage with more details.

Rarity

Collection NFTs may be considered rare or valuable due to the uniqueness or rarity of the individual NFTs that comprise the collection. The rarity or value of a collection NFT is determined by the rarity or value of the individual NFTs that make up the collection, as well as other factors such as demand or perceived value.

Utility

Collection NFTs may offer additional utility or functionality beyond the individual NFTs that make up the collection. For example, a collection NFT may grant access to exclusive content or experiences, or it may provide other benefits or privileges.

Ownership

The ownership of a collection NFT represents ownership of all the individual NFTs that make up the collection. This means that the owner of a collection NFT has the right to use, sell, or otherwise dispose of the individual NFTs that make up the collection.

Transferability

Collection NFTs are transferable and can be bought and sold like other NFTs.

HERE IS A LIST PROPERTIES OF SETTING A COLLECTION PRICE FOR NFT :

Logo image

A navigation image of 350 x 350 pixels in size.

Featured image

A 600 x 400 pixels image used to feature the collection on Oceansky's pages and supports various file types with max size 100MB.

External links

Links to external website or resource included in the metadata.

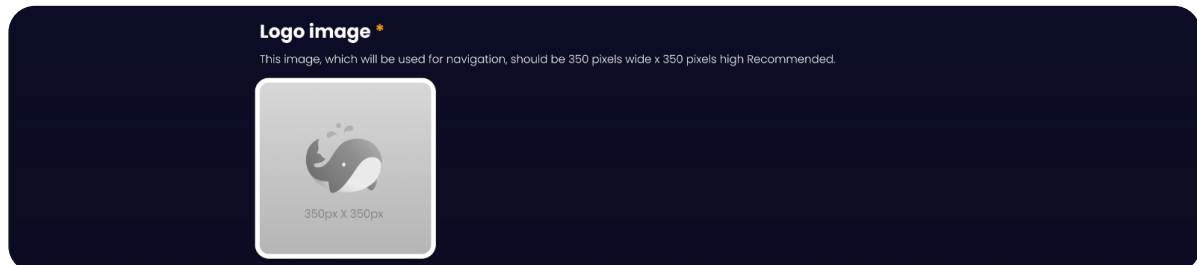

Oceansky Ranking

Ranking NFT marketplaces based on various criteria.

Logo image

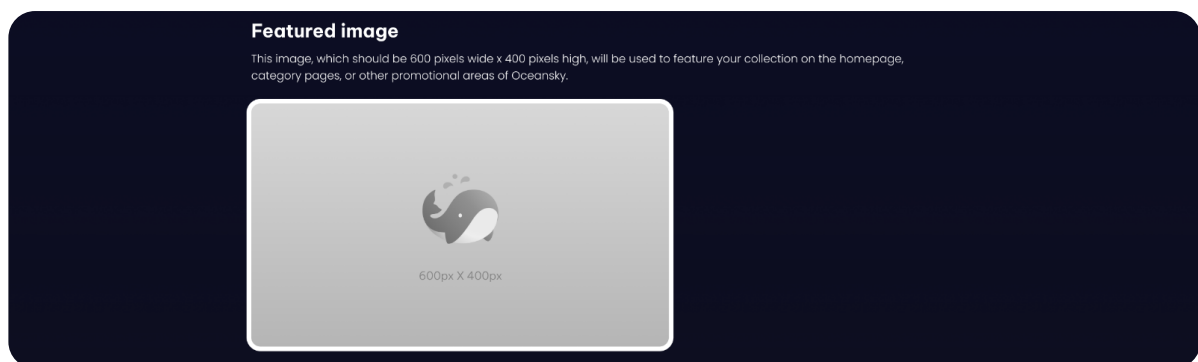

This image, which will be used for navigation, should be **350 pixels wide x 350 pixels high Recommended.**

Choose **a logo image** for your collection. This image should be **350 pixels wide x 350 pixels high** and of sufficient quality for display. The logo image will be used for navigation, so it is important to choose an image that is clear and visually appealing.

Featured image

File types supported: PNG, JPG, GIF, SVG, WEBM, MP4, MP3, WAV, OGG, GLB and GLTF. Max size: 100 MB

This image, which should be 600 pixels wide x 400 pixels high, will be used to feature your collection on the homepage, category pages, or other promotional areas of Oceansky.

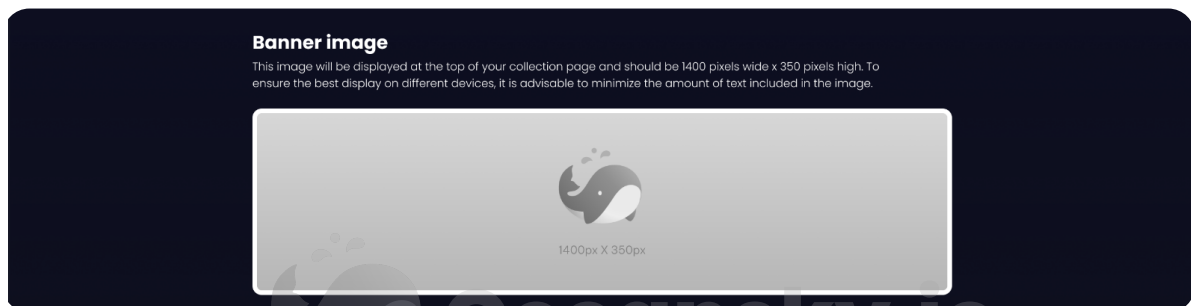

Choose **a featured image** for your collection that is 600 pixels wide x 400 pixels high and of sufficient quality for display. The featured image will be used to promote your collection on the homepage, category pages, or other promotional areas of Oceansky so, it is important to choose an

image that is eye-catching and represents the theme or content of your collection. Oceansky supports the following file types for the featured image: PNG, JPG, GIF, SVG, WEBM, MP4, MP3, WAV, OGG, GLB, and GLTF, with a maximum size of 100 MB.

Banner image

File types supported: PNG, JPG, GIF, SVG, WEBM, MP4, MP3, WAV, OGG, GLB, and GLTF. Max size: 100 MB.

This image will be displayed at the top of your collection page and should be 1400 pixels wide x 350 pixels high. To ensure the best display on different devices, it is advisable to minimize the amount of text included in the image.

The banner image is a visual representation that appears at the top of the collection page. It is meant to serve as an introduction or overview of the collection and should be eye-catching and visually appealing.

The banner image should be **1400 pixels wide x 350 pixels high**, and it should be in one of the following file types: PNG, JPG, GIF, SVG, WEBM, MP4, MP3, WAV, OGG, GLB, and GLTF. The maximum size for the banner image is 100 MB.

It is advisable to minimize the amount of text included in the banner image in order to ensure that it displays well on different devices. This means that you should try to use imagery and other visual elements to convey the theme or message of the collection, rather than relying on text.

Collection Name

Collection Name *

Collection Name

The collection name is the title or name of your NFTs collection. It should be a brief and descriptive title that reflects the theme or subject matter of your collection.

The collection name is important because it helps to give your NFT collection a sense of identity and helps potential buyers understand what they can expect to find in your collection.

Description

The Description will be included on the collection's detail page underneath its image. Markdown syntax is supported.

Description

The description will be included on the collection's detail page underneath its image. **Markdown** syntax is supported.

Please provide a detailed description of your item.

A collection of NFTs is a group of NFTs that are related to each other in some way, such as being part of the same series or being created by the same artist. Creating a collection of NFTs on an NFT marketplace typically involves uploading the NFTs to the platform and organizing them into a cohesive group.

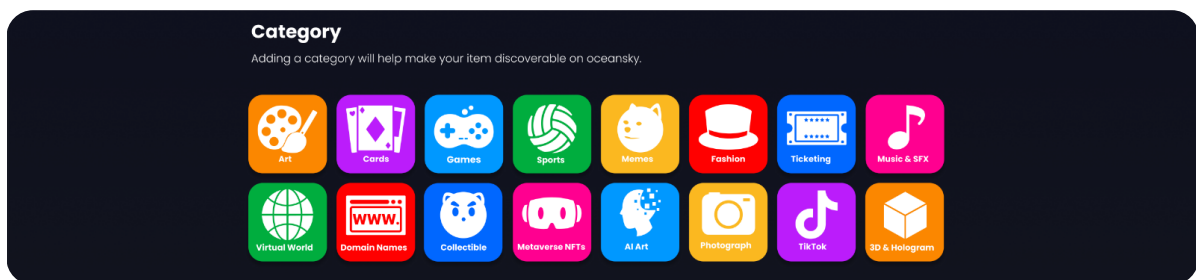

The description of a collection of NFTs is a written overview or explanation of the collection that is intended to provide context and background information to potential buyers. The description is usually included on the collection's detail page, which is a dedicated page on the NFT marketplace that provides more information about the collection. The description is typically displayed underneath the collection's image, and it may include details such as the creator's background, the inspiration behind the NFTs, or the significance of the collection.

Markdown syntax is a way to format text in a simple, easy-to-read syntax that can be converted into HTML (HyperText Markup Language) for display on the web. Markdown is often used on NFT marketplaces and other online platforms to allow users to add formatting, such as headings, lists, and links, to their text without using complex HTML code.

Category

Choose your category list.

To choose a **category** for NFTs, you can select from a list of options such as Arts, Cards, Games, Sports, Memes, fashions, Ticketing, Music & SFX, Virtual World, Domain names, Collectible, Metaverse NFTs, Ai Art, Photograph, Tik Tok and 3D & Hologram.

Categories are a way to group and organize NFTs based on their theme, subject matter, or use case. When creating an NFT collection, you will need to select a category that best represents the content of your collection.

HERE IS A LIST OF AVAILABLE CATEGORIES TO CHOOSE FROM :

Arts

This category includes NFTs that are related to art, such as digital art, paintings, illustrations and etc.

Cards

This category includes NFTs that are used for collectible card games or other card-based games.

Games

This category includes NFTs that are related to games, such as in-game items, characters and etc.

Sports

This category includes NFTs that are related to sports, such as sports memorabilia or collectibles.

Memes

This category includes NFTs that are related to memes or internet culture.

Fashions

This category includes NFTs that are related to fashion, such as virtual clothing, accessories and etc.

Ticketing

This category includes NFTs that are used for event ticketing, access to events or experiences.

Music & SFX

This category includes NFTs that are related to music or sound effects.

Virtual World

This category includes NFTs that are used in virtual worlds, online communities and etc.

Domain names

This category includes NFTs that represent ownership of a specific domain name.

Collectibles

This category includes NFTs that are used for collectibles and other items that are valued for their rarity or uniqueness, including but not limited to.

Metaverse NFTs

This category includes NFTs related to the metaverse, a virtual shared space created by the convergence of virtual and physical worlds.

AI Art

This category includes NFTs that are created using artificial intelligence.

Photograph

This category includes NFTs that are related to photography.

Tik Tok

This category includes NFTs that are related to the social media platform TikTok.

3D & Hologram

This category includes NFTs that are related to 3D modeling or holograms.

When selecting a category for your NFT collection, you should choose the one that best fits the theme or subject matter of your collection. This will help potential buyers understand what they can expect to find in your collection and make it easier for them to find your collection in search results.

External Link

Oceansky will include a link to this URL on this item's detail page, so that users can click to learn more about it, you are welcome to link to your own webpage with more details.

External links are links to external websites or online resources that are included as part of the metadata for the NFT. The metadata for an NFT is information about the NFT that is stored on the blockchain and can include a variety of different types of information, including external links.

These links can provide additional information or context about the NFT, or they may allow the NFT to interact with other online services or platforms.

For example, an NFT might include a link to a website with more information about the artist who created the NFT, or a link to an online marketplace where the NFT can be bought or sold. External links in NFTs can be used to provide additional value or functionality to the NFT and enhance the user experience.
